

ASSIGNMENT – 2

Team ID	PNT2022TMID44984
Name	S.Ponnarasu
Project Name	Gas Leakage monitoring & Alerting system for Industries
Marks	2marks

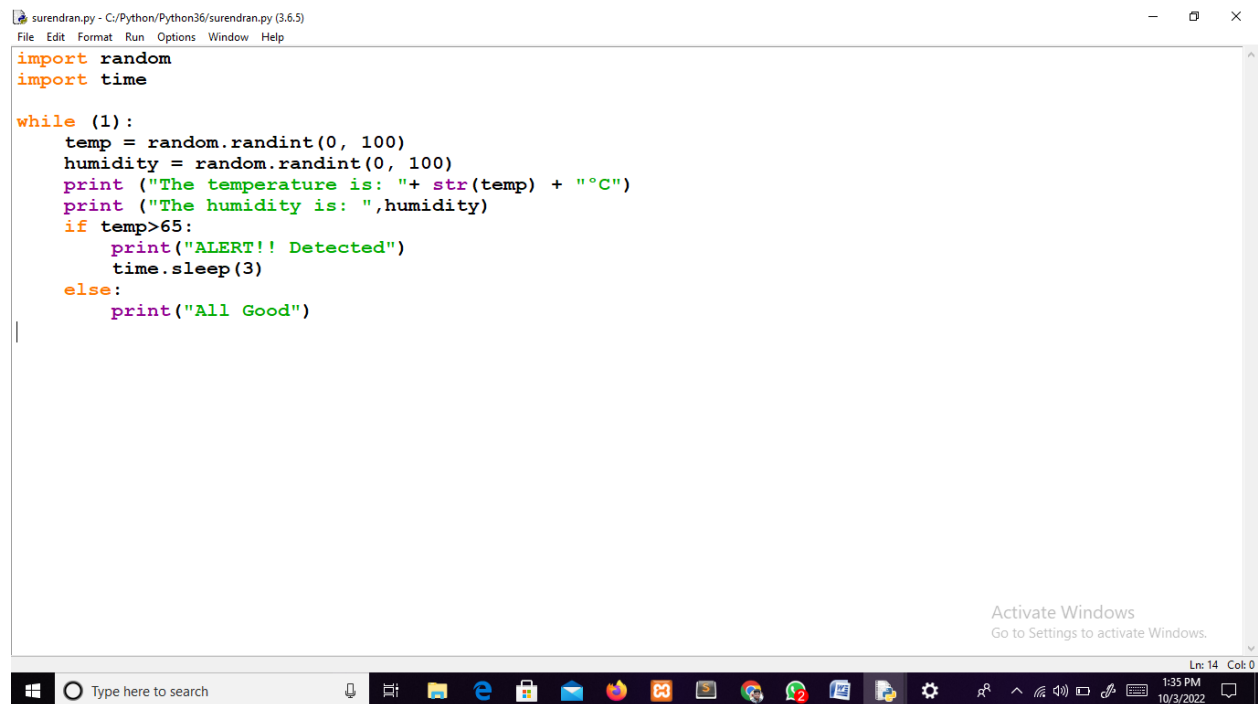

Assignment Question:

Built a python code, Assume u get temperature and humidity values(generated with random function to a variable) and write a condition to continuously detect alarm in case of high temperature.

Python code:

```
import random
import time
while (1):
    temp = random.randint(0, 100)
    humidity = random.randint(0, 100)
    print ("The temperature is: "+ str(temp) + "°C")
    print ("The humidity is: ",humidity)
    if temp>65:
        print("ALERT!! Detected")
        time.sleep(3)
    else:
```

```
print("All Good")
```

```
surendran.py - C:/Python/Python36/surendran.py (3.6.5)
